

Web Development

Rosleys is a successful Law firm. They operate with the Midlands area, UK and has become a leading Family Lawyers and Divorce Solicitors in Nottingham.

They were looking for a more contemporary, dynamic and maintainable website. It was important for us to create a 'real' feel, something that didn't appear too expensive and untouchable to the general public.

Rosleys managed to generate new custom within the first couple of weeks of the site going live. Our design and website development has given them a distinct identity, communicating the nature of their business instantly. We carried their branding and minimal colour palette throughout the website along with search tools, strong accessibility via main menu drop and high search engine results for Solicitors Nottingham, divorce and family law'.
